

It's Time That We Got Our 'Right-Left' Right!

The Political Spectrum

That we have been taught now for entire generations is a complete LIE!

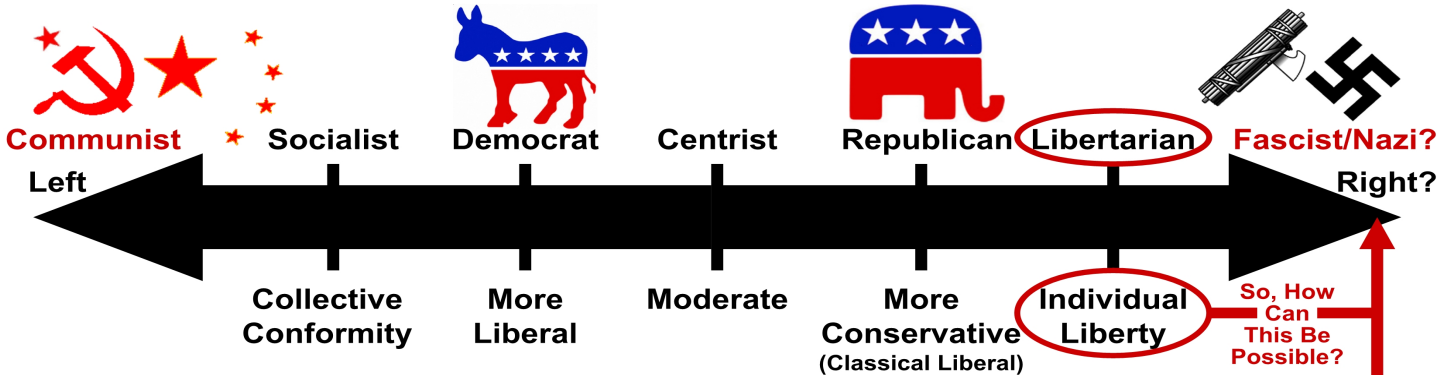

**CONFUSE PEOPLE THROUGH 'INVERSION'
AND CREATE A FORM OF 'MASS-PSYCHOSIS'!**
(Turn everything around and around and upside down)...

THE FALSE POLITICAL SPECTRUM

AS IT'S ALWAYS DESCRIBED OF AS IN TWO DIMENSIONS

It's what your teachers, the media, government, and everybody else has been telling you over all these years...

The false narrative that 'fascism' is on the 'far right' and that 'communism' is the far left at opposite ends of the spectrum is in the fact that they are both political systems of TOTALITARIANISM.

IT'S ALL BEEN
A GREAT BIG LIE!

LEFT

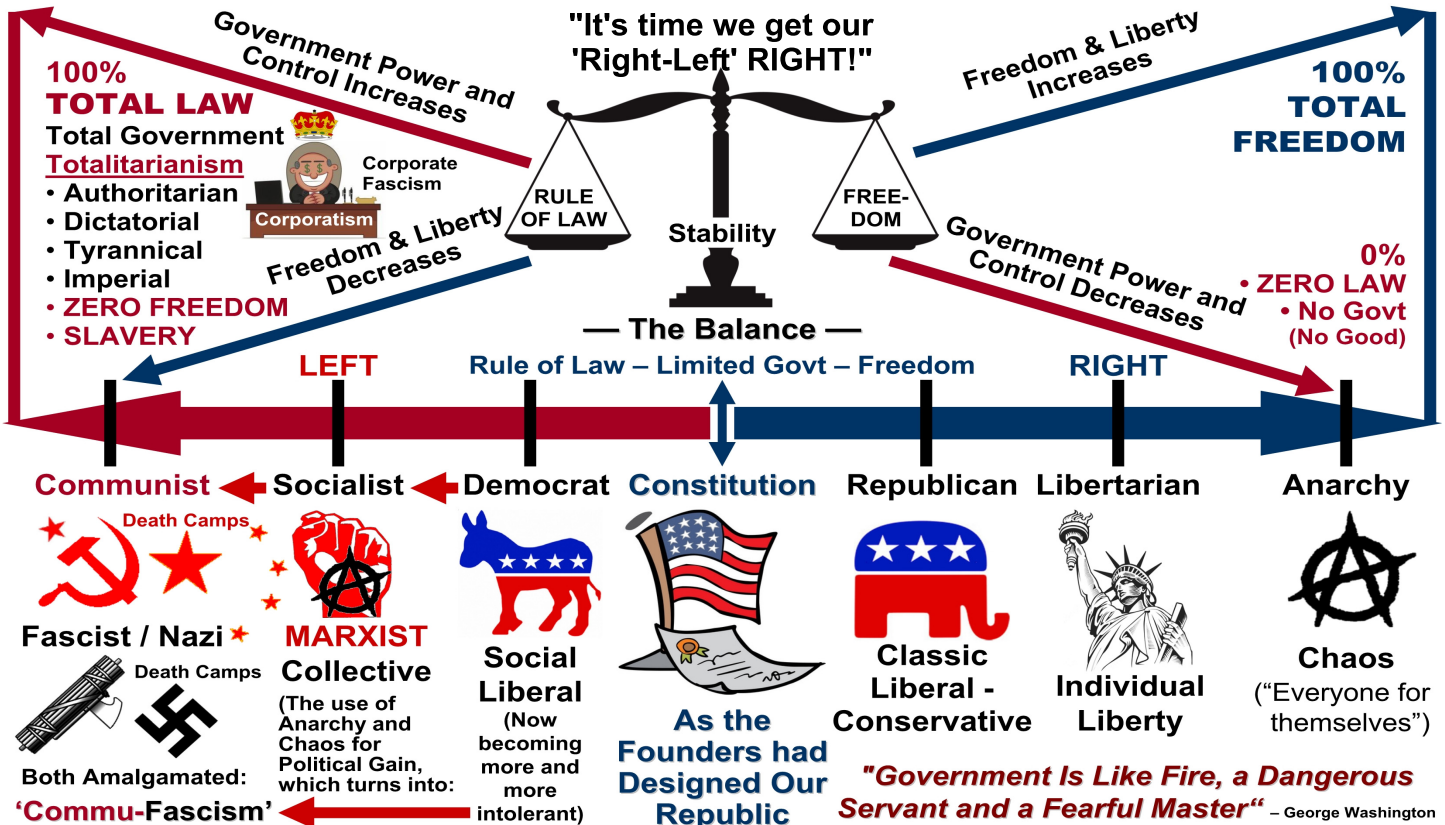

More Government
Less Individual Freedom
More State Power & Control

THE REAL POLITICAL SPECTRUM

AS REPRESENTED IN A TWO / THREE DIMENSIONAL MODEL

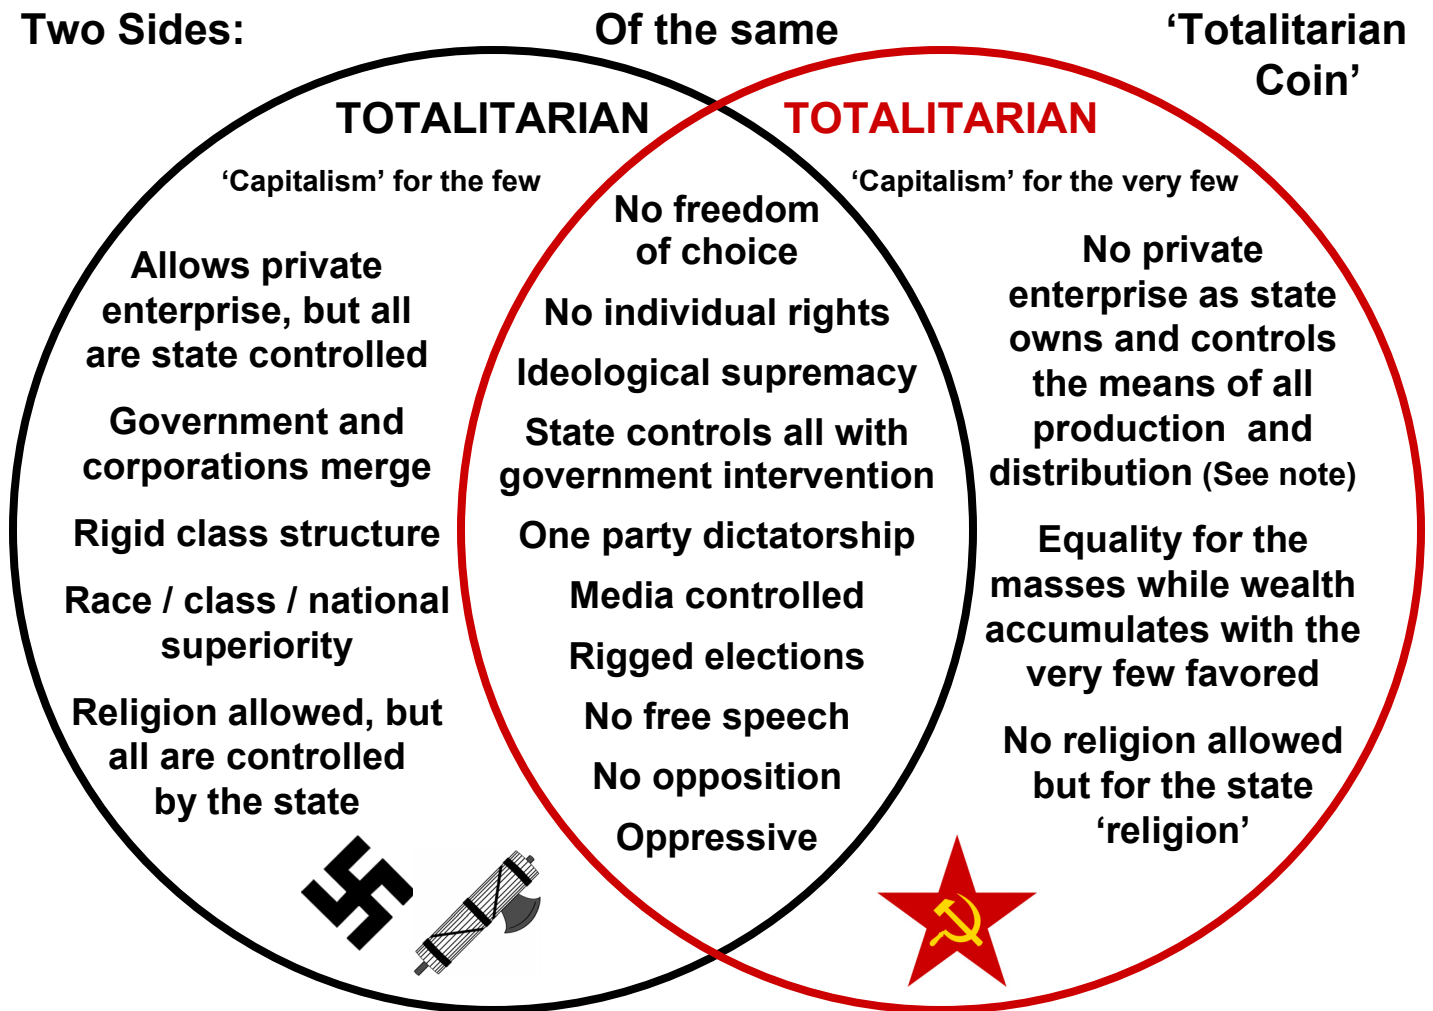

RIGHT

Less Government
More Individual Freedom
Less State Power & Control

- FASCISM - - COMMUNISM -

Basic Differences and Similarities

Communism

As a socioeconomic system, Communism considers all property to be communal — that is, owned by the community (or actually by the state). This system also stresses the importance of a "classless" society, where there are no differences between the wealthy and the working classes (except for the rulers and their favored groups who covet all the wealth and luxuries), between men and women, or between races.

Fascism

As is evident by multiple definitions of Fascism, there is considerable variations in what social scientists call Fascism. Nevertheless, it generally means fascism is also a political and economic system, but its focus is on a single nation state, as ruled mostly by a dictator, and on a rigid social structure. Under fascism, hyper-masculinity, youth, and even violence and militarism are held in high regard. Any "outside" idea that conflicts with the nation state is not tolerated; as such, fascism often shuns conservatism, liberalism, democracy, and communism, alike, and is also generally hostile toward equality for women and different races and people.

NOTE:

That since China has grafted a general form of 'capitalism' to its now 'amalgamated communist corp. model' that is closer to fascism, all private enterprise is strictly monitored and controlled by a one party state, and it is spread internationally and used as a means of economic and cultural infiltration, espionage, and dominance over other target countries, economies, cultures, media and governments.

(The better term for this is 'Commu-Fascism' as they have now become amalgamated)

AND THE OTHER FALLACY THAT HAS BEEN PERPETUATED IN THE PUBLIC CONCIIOUSNESS FOR GENERATIONS:

“AMERICA IS A DEMOCRACY”

The United States of America IS NOT a “Democracy”. It never was, nor was it ever intended to be one by our Founders... It is a

‘CONSTITUTIONAL REPUBLIC’

And the ‘democratic process’ is a feature of our ‘Constitutional Republic’. It may reasonably be referred to as a ‘Democratic-Republic’, but actually a ‘Constitutional Republic’ is the official term as established by our founders.

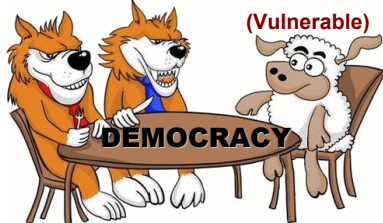

Senate

Each state is essentially a sovereign nation with it’s own government with it’s own set of laws and services. People elect state representatives to their state legislatures which in turn are intended to elect or appoint representatives (2) to the Senate to represent the state’s interests in Congress as a sovereign entity.

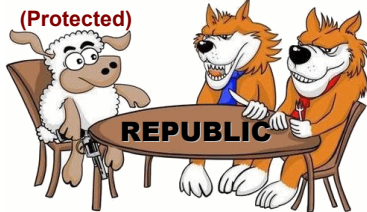

As in a ‘Republic’, the states are represented as sovereign geographic entities and NOT as a factor of their population densities as may give unfair advantage in a ‘pure democracy’ that those in the country should not be ruled by the cities.

— The Balance —

“A PURE DEMOCRACY” can be described as two wolves and one sheep deciding on and voting what to have for dinner...

— The Difference —

House

Each state is divided up into Congressional Districts in which the people—the citizens directly elect their chosen representatives in the democratic process to represent in congress the interests of their particular district. Thus, the state’s interests are represented directly in the Senate, and the voters’ in districts are represented democratically in the House of Reps.

A ‘Pure Democracy’ is simply ‘Majority Rule’ where minority populations do not have sufficient representation and are subject to ‘The Tyranny of the Majority’ which can subject them to discrimination and in many case, even worse!
